The Mark of Kohler Quality

The name Kohler, in dainty blue letters, is inconspicuously but permanently fused into the enamel of every Kohler fixture — a modest symbol of quality and an unfailing assurance of worth

Kohler Quality

KOHLER QUALITY is a definite and accepted fact not only with the Plumbing Trade and among Architects but in the preferences of countless thousands of discriminating people.

Quality can scarcely be catalogued—unlike the shapes, contours, and specifications of fixtures, it is not easy to picture or to set forth in type. It is evidenced rather by the integrity and competence of the organization, and by Reputation—public acceptance of the product over a long period of time.

Throughout a long history the guiding purpose of the Kohler organization has been to manufacture products of unusual excellence.

In carrying out this idea no exceptions are tolerated. Accordingly, Kohler Enameled Plumbing Ware is sold in one quality only—and that the best. Fixtures vary in size and elaborateness and hence in price; but the materials used, the equipment, the processes, and the workmanship are exactly the same in all Kohler fixtures.

The result has been an unmistakably emphatic public indorsement. A list of Kohler installations would very nearly constitute a Blue Book of America's finest hotels, institutions, and homes. At the same time, it is a significant fact that the quality market does not consist of merely a small group. The world's progress in taste and in observance of the laws of hygiene has enormously increased the demand for good fixtures, and has made it possible to have economical production in large volume.

Highest Grade Basic Materials

The bath tub, lavatory and sink are necessary furnishings in every modern home. For these white enameled iron has established itself as the most popular and satisfactory material, and the material best adapted to successful manufacture.

The widespread preference for enameled iron fixtures is due largely to a Kohler achievement—the discovery of means of making every fixture pure white, not near-white. The Kohler enamel in addition is exceptionally hard and smooth. Kohler fixtures, with their enduring lustre, present an inviting cleanliness and are easy to *keep* clean.

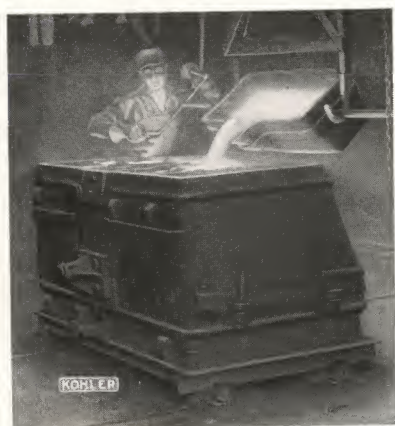

The chemical laboratory where materials for Kohler Ware are tested .

The materials entering into the Kohler enamel are somewhat more expensive than ordinary, but the satisfaction thus insured the user more than justifies the cost. And bear in mind that the price of Kohler fixtures is no higher than is charged for less finished, less beautiful, and less durable products.

Every material entering into Kohler Ware is of a similar high grade. The iron, for example, is selected and mingled so as to be of exactly the right chemical formula, as determined by the Kohler laboratories, for the best castings for enameling.

Technique of Construction

The most notable development in the manufacture of plumbing fixtures and in the commercial use of enamel has occurred in comparatively recent times, and much of this progress is practically the history of Kohler of Kohler.

Pouring molten iron into a bath tub mold

A foremost development has been in the manufacture of all-over enameled, one-piece, built-in baths, of the type of the Kohler "Viceroy" and "Imperator." In simple beauty of line, in the promotion of hygiene through eliminating crevices and flutings, in the clean and shimmering blanketing of pure white enamel, and in such practical advantages as the

The Kohler enamel in the form of a white impalpable powder is sifted on the hot casting and fused at a high temperature

heat-retaining air space underneath the apron, this type of bath, originated at Kohler, stands as one of the great forward steps of the age. Not only does it excel in its satisfying beauty of appearance, but it is more convenient to use, easier to keep clean, more hygienic than any other type of bath ever devised.

And this is but a single example of the fruitful labors of the Kohler research department, where every detail of pattern and construction, every consideration of beauty, utility, and durability is studied with the single view of making Kohler products the finest and most serviceable that can be obtained.

Modern Processes of Manufacture

All Kohler products are made in one great factory, located at Kohler, Wisconsin. This fact insures uniformity of method and process and uniformity of excellence.

The Kohler factory is one of the finest and best equipped in the country. It combines the advantages of modern power equipment for heavy tasks and the proud skill of highly trained workmen in processes, like enameling, where competent personal attention is required.

Back-breaking labor has been eliminated to a great extent, and with the aid of mechanical power the Kohler workman is a directing intelligence wielding forces that lift, shove, grind, and perform a multitude of other tasks. Mechanical stokers, electric cranes, compressed air lifts, overhead and floor conveyors, and many other mechanical aids are utilized to secure efficient, and speedy, production.

Expert inspectors minutely examine every Kohler fixture

Typical of the equipment are the many molding machines in use. With their aid the greatest uniformity in castings is made possible and the cost of making them is reduced to a minimum.

At every step in manufacture the product is under the watchful eye of inspectors and must conform to the Kohler standard of quality. Any piece that does not meet the requirements of first quality is broken up and treated simply as raw material to be again melted in the cupolas.

Fixtures passing final inspection are identified not only by the blue and gold label reproduced below, but since this might be removed, they have the trade-mark Kohler permanently fused into the enamel, an inconspicuous but permanent identification and mark of responsibility.

The Kohler Organization

Kohler Ware is manufactured by a group of people possessing not only high individual skill but also a rare spirit of co-operation. The organization is closely knit together. The larger number of its members have worked together a long time, many of them for years. This fact both attests their interest in their work and associations, and indicates an important reason for their efficient teamwork.

The Kohler community and factory have become known far and wide for the happy conditions that prevail. This refers not only to facilities for productive work, but to provision for health and safety, individual prosperity, and recreation. The pleasant environment and relations that exist are favorable to the most efficient productive work.

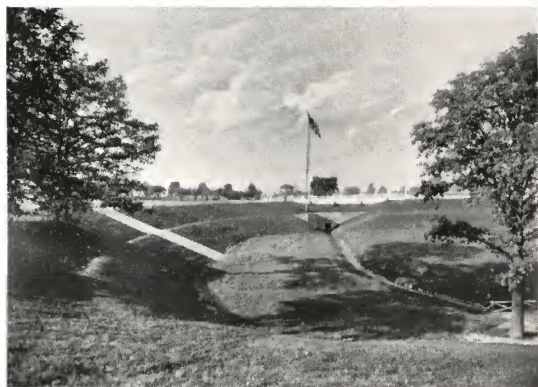

The American Club at Kohler

Kohler Village

A PRODUCT usually reflects the character of the people who make it. An index to the character of the people in the Kohler organization can most quickly be had by a glimpse of their homes and their civic achievements.

The village of Kohler is outwardly beautiful and modern. Every street is paved and well lighted, modern utilities are universally in use, and every home presents an aspect of cleanliness, taste, and comfort. Civic progressiveness is apparent in a beautiful public school, fine parks, and a commodious Nature Theatre that has few rivals in attractiveness.

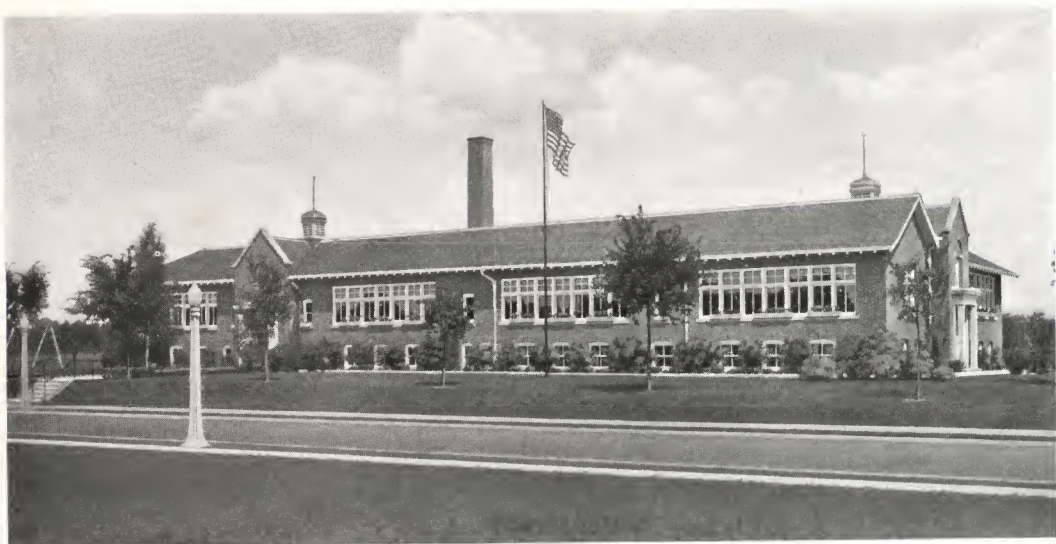

The American Club, maintained by the company as a home for single men of the organization, a dining hall for everybody,

The Kohler Nature Theatre

A representative group of homes

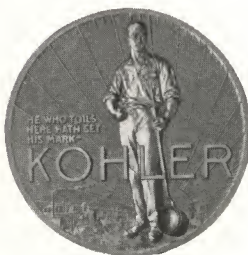

The public school at Kohler

and a center of recreation, is a commodious and beautiful Gothic building, an ornament to the community as well as a useful institution. It provides splendid accommodations to workmen at moderate cost, besides serving other useful purposes.

Practically every family in the village owns its home, an important indication of the high character of the people.

Of more interest, perhaps, than even the finest streets, parks, and buildings, is the fact that the people of Kohler, through their elected officers and village government, have for some years been building up the community according to a comprehensive Village Plan. Zones have been established for industry, business, and residences. The need for new streets, parks, playgrounds, and other public places has been foreseen and provided for. Beauty, education, and recreation, as well as utility, have been considered.

These are the people who make up the Kohler organization—people with vision, purpose, resourcefulness and readiness to cooperate. Their character underlies the character of Kohler products.

Enlarging the Market for Kohler Quality Products

THE Kohler policy is a protection to every one selling or using Kohler products, since it is an assurance of the highest grade of goods.

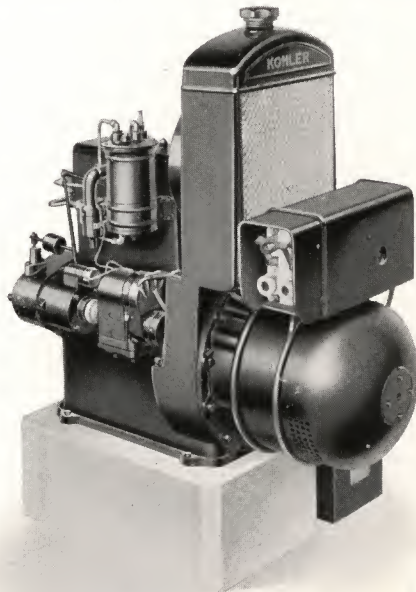

For those handling Kohler Ware there is an additional and powerful influence at work making the name and the product known, and suggesting its value and its uses. That influence is Kohler national advertising, which is constantly enlarging the market. It is at the same time a perpetually renewed pledge of the faith and reputation of the company, backing up the integrity and value of every piece of Kohler Ware.

Kohler Automatic Power and Light

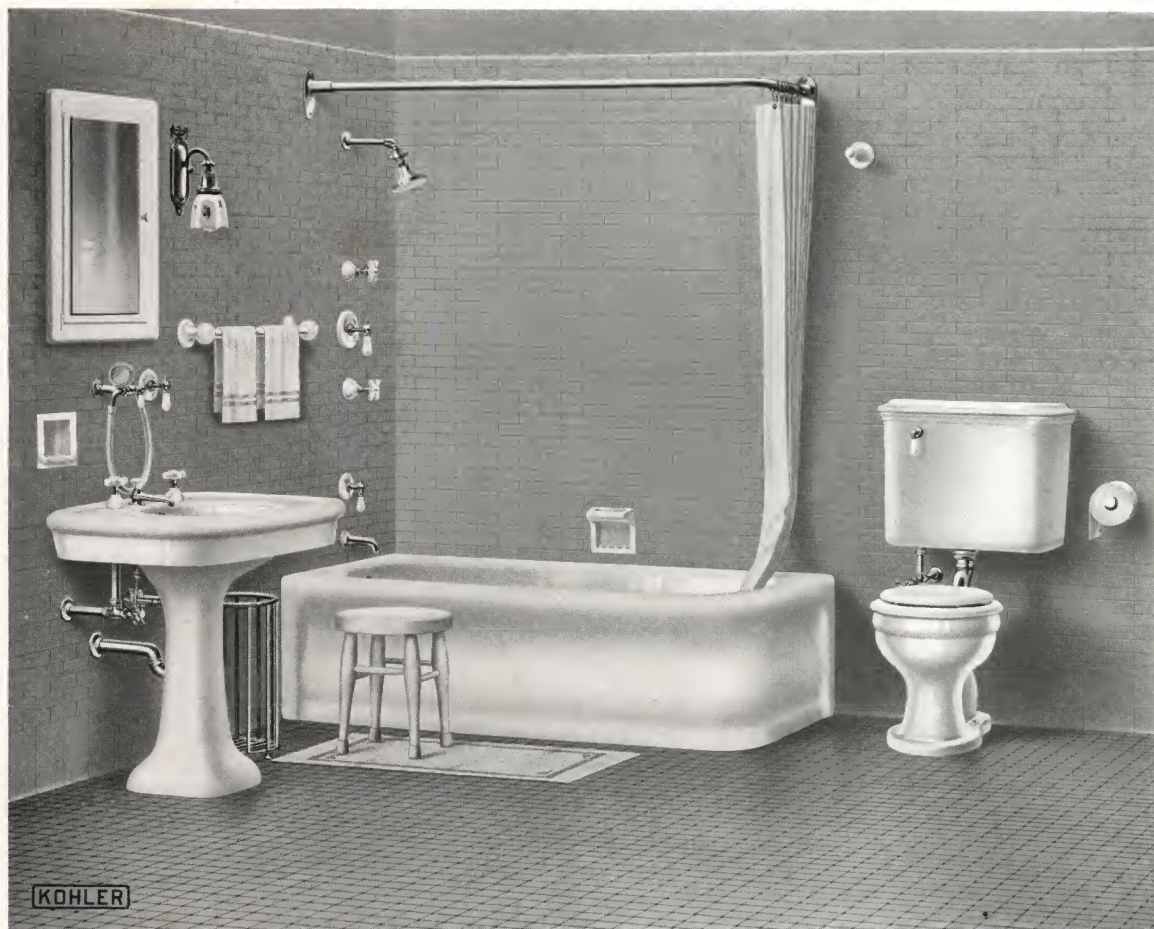

A NEWER product of the Kohler organization, but one worthy to rank with Kohler Ware, is the Kohler Automatic Power and Light 110 Volt D. C. This is a wonderful little electric generating unit consisting of a gasoline engine directly connected with an electric generator. It has no storage batteries for power or light—simply a little starting battery to turn over the engine. It furnishes standard 110 volt current direct from the generator and has a capacity of 1500 watts. It is so arranged that when any light or appliance in the circuit is turned on the unit starts automatically, and when current is no longer being used it stops automatically.

The Kohler Automatic not only has wonderful sales possibilities in itself but it constitutes another contribution toward enlarging the dealer's market for Kohler Ware. It makes it possible for farmers and country home owners, and in fact people everywhere, to have an automatic electric water system, enabling them to enjoy the benefit of a complete plumbing installation.

The Kohler Automatic is a worthy Kohler product and stands alone in its field, no other unit having its remarkable combination of advantages.

Lavatory Features

Top View

KOHLER Depressed Enameled Lavatory Soap Cup and Enameled Vertical Bar Overflow are distinctive improvements and sanitary features. The soap cup is cast in the slab and enameled, with an opening in it, draining into the overflow.

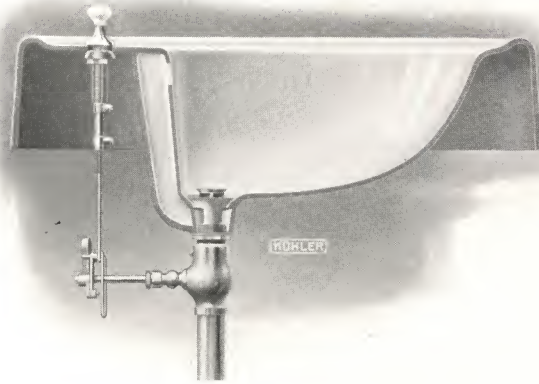

All metal parts are eliminated, leaving a smooth white enameled surface without any joints or crevices for dirt or sediment to lodge.

The flare shaped construction of the waste outlet has greatly reduced the danger of the enamel cracking or chipping off.

Sectional View

Lavatory and Lift Waste

Lift Waste with Handle Operating through
Slab of Lavatory

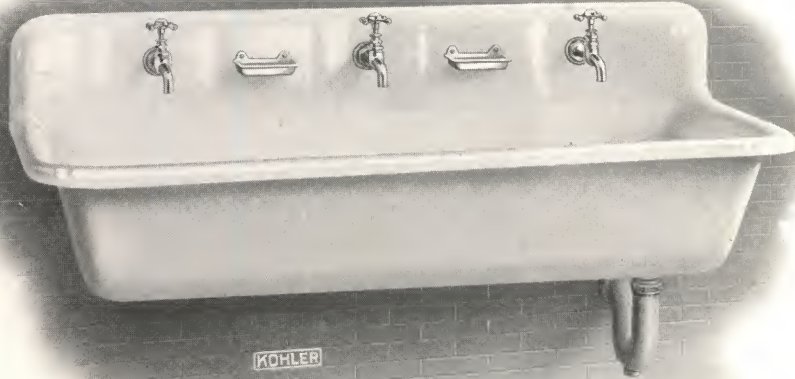

KOHLER Nickel Plated Brass Lift Waste is designed to displace the common waste plug with stopper and chain. All parts are so designed that sediment cannot lodge, and no waste water can remain in the plug. The action of the waste is always positive as it is not dependent upon springs or friction to hold the stopper open.

The handle on the waste operating through back of lavatory can be interchanged to harmonize with the various styles of handles for basin faucets.

Lift Waste with Handle Operating through
Back of Lavatory

Urinal tank can be furnished with bottom supply, or chain and pull fittings

Showers

F-1605

KOHLER Combination Bath Over Rim Supply, Waste and Shower with 4 inch cast head and ball joint, $\frac{1}{2}$ inch built in mixer and compression controlling valves with connections for iron pipe, 2 inch secret waste with holders, china handles and escutcheons.

F-1610

KOHLER Combination Bath Over Rim Supply, Waste and Shower with 4 inch cast head and ball joint, $\frac{1}{2}$ inch built in mixer and compression controlling valves with connections for iron pipe, $1\frac{1}{2}$ inch connected waste and overflow, china handles and escutcheons.

Specify when ordering if above showers are wanted with:

$\frac{3}{4}$ inch mixer and $2\frac{1}{4}$ inch secret waste.

Poppet waste as shown on F-1780 bath fixture in place of connected waste and overflow.

Special side discharge head for installation as shown in F-6-SJ, F-10-DJ and F-86-SJ bath tubs.

Needle bath attachment as shown in F-16-RH bath tub.

Valves in above showers are semi-quick acting, and valves and mixer have renewable seats and swivel disks. Above showers are designed for use with built in bath tubs only, and can be installed in wall positions shown on any of our built in bath tubs. Built in parts shown in outline only are not regularly furnished and may be made of galvanized iron pipe and fittings. Supplies to mixer should be fitted with check valves.

F-1909 and F-1911 hose couplings fit supply spouts as regularly furnished.

Secret waste and connected waste and overflow have $1\frac{1}{2}$ inch O. D. tailpiece and also $1\frac{1}{2}$ inch iron pipe male thread on tee outlet.

For curtain rails and curtains see F-1705 to F-1720.

Unless otherwise specified, showers will be furnished for installation at end of bath tub. If wanted for side center installation, state also size of bath tub.

When ordering specify number of shower and number of bath tub for which shower is intended

Showers

F-1615

KOHLER Combination Bath Top Supply, Waste and Shower with 4 inch cast head and ball joint, $\frac{1}{2}$ inch built in mixer and compression controlling valves with connections for iron pipe, 2 inch secret waste with holder, china handles and escutcheons.

F-1625

KOHLER Shower with 4 inch cast head and ball joint, $\frac{1}{2}$ inch built in mixer and compression controlling valves with connections for iron pipe, china handles and escutcheons, shampoo attachment, hose, spray and hook.

Can be furnished without shampoo attachment.

Specify when ordering if above showers are wanted with:

Poppet waste, connected waste and overflow, $2\frac{1}{4}$ inch secret waste in place of waste shown in F-1615 shower, or $\frac{3}{4}$ inch mixer.

Special side discharge head for installation as shown in F-6-SJ, F-10-DJ and F-86-SJ bath tubs.

Needle bath attachment as shown in F-16-RH.

Valves in above showers are semi-quick acting, and valves and mixer have renewable seats and swivel disks. F-1615 shower is designed for use with built in bath tubs only, and F-1625 shower with built in bath tubs and receptors. Installation can be made in wall positions shown on any of our built in bath tubs. Built in parts shown in outline only are not regularly furnished and may be made of galvanized iron pipe and fittings. Supplies to mixer should be fitted with check valves. F-1625 shower without shampoo attachment is not supplied with valve in riser and does not require check valves.

F-1909 and F-1911 hose couplings fit supply spout as regularly furnished with F-1615 shower.

Secret waste in F-1615 shower has $1\frac{1}{2}$ inch O. D. tailpiece and also $1\frac{1}{2}$ inch iron pipe male thread on tee outlet.

For curtain rails and curtains see F-1705 to F-1720.

Unless otherwise specified, showers will be furnished for installation at end of bath tub. If F-1615 shower is wanted for side center installation state also size of bath tub.

When ordering specify number of shower and number of bath tub for which shower is intended

Showers

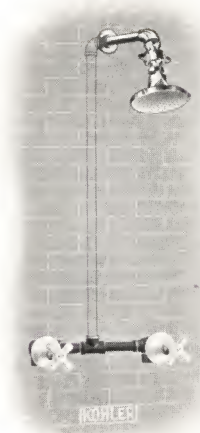

F-1630

F-1630

KOHLER Shower with 4 inch cast head and ball joint, controlling valve, ½ inch mixer with connection for iron pipe, china handles and escutcheon.

F-1635

KOHLER Shower with 4 inch cast head and ball joint, ½ inch built in compression valves with connections for iron pipe, china handles and escutcheons.

F-1635

Specify when ordering if above showers are wanted with:
Shampoo attachment and valve in riser for F-1635 shower as shown in F-1625.
Special side discharge head for installation as shown in F-8-SJ, F-10-DJ and F-86-SJ bath tubs.

Mixer in F-1630 shower and valves in F-1635 shower are semi-quick acting and have renewable seats and swivel disks.

Above showers are designed for use with built in bath tubs and receptors. Installation can be made in wall positions as shown on any of our built in bath tubs. Built in parts shown in outline only are not regularly furnished and may be made of galvanized iron pipe and fittings. When furnished with shampoo, F-1635 shower should be fitted with check valves. For curtain rails and curtains see F-1705 to F-1720.

F-2220

F-2220

KOHLER Nickel Plated Brass Wrought Adjustable "P" Trap with inlet for slip joint connection

Sizes $1\frac{1}{4}$ $1\frac{1}{2}$ 2 inches

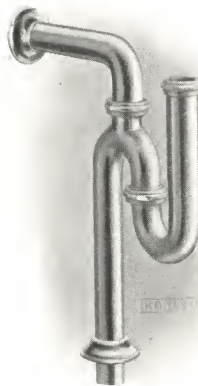

Can be furnished with cleanout, exposed or built in vent, and $1\frac{1}{2}$ and 2 inch sizes for 4 inch deep water seal.

F-2240

KOHLER Nickel Plated Brass Wrought Adjustable "S" Trap and exposed vent with inlet for slip joint connection.

Sizes $1\frac{1}{4}$ $1\frac{1}{2}$ 2 inches

Can be furnished with cleanout, without vent, and $1\frac{1}{2}$ and 2 inch sizes for 4 inch deep water seal.

F-2240

F-2242

F-2242

KOHLER Nickel Plated Brass Cast Body Offset "P" Trap with inlet for slip joint connection

Sizes $1\frac{1}{4}$ $1\frac{1}{2}$ inches

When ordering specify number and size

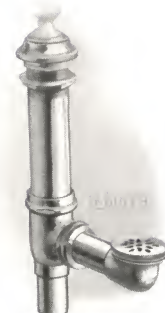

Nickel Plated Brass Fittings

F-2245

Secret Waste with china knob

Sizes 1½ 2 inches

F-2245 1½ inch secret waste is designed for use with lavatories 16 to 19 inches wall to front (except corner lavatories) and 2 inch size for all other larger lavatories, including all corner lavatories.

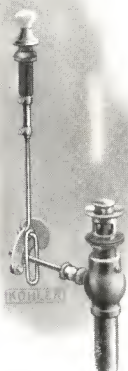

F-2245

F-2261

Lift Waste with china knob for operating through slab.

Sizes

- No. 1. For all lavatories less than 22 inches front to rear including corner lavatories, except "Derby," "Narobol" and "Midget" lavatories.
No. 2. For lavatories 22 inches front to rear and wider.

F-2261

F-2271

Lift Waste with china handle for operating through back. Can be furnished with china lever handle.

F-2271

F-2280

Continuous Waste Pipe with slip joint connections

Sizes 1¼ 1½ 2 inches

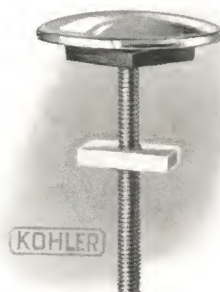

Can furnish with from 2 to 8 branches. Always state number and distance center to center of branches, and for 1½ and 2 inch sizes, also size of inlets desired. Can also furnish with center outlet. For traps see F-2220 to F-2242.

F-2305

Lavatory Patent Overflow Plug with rubber stopper.

F-2305 As described.

F-2311

Cock Hole Cover.

F-2314

Lavatory Chain Stay Bolt. Can be furnished for 1 inch hole.

When ordering specify number and size

Fountain Fittings

F-2315

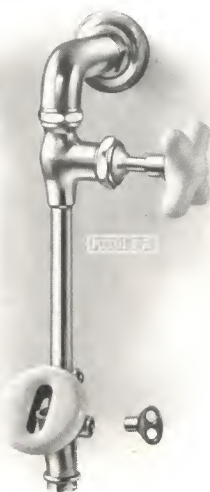

KOHLER Combination China Non-squirting Stream Jet with nickel plated brass swing arm, loose key flow regulator and compression sink faucet.

F-2316

KOHLER Combination China Non-squirting Bubbler with nickel plated brass swing arm, flow regulator and compression basin faucet.

Water flows through above jet and bubbler when swung forward, and shuts off when turned to right hand side on F-2315 jet and to left hand side on F-2316 bubbler.

F-2317

KOHLER Combination China Non-squirting Stream Jet with nickel plated brass arm, loose key flow regulator and compression valve.

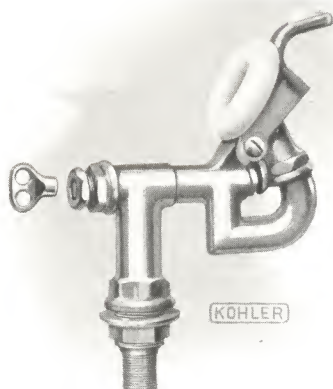

F-2318

KOHLER Combination China Non-squirting Stream Jet with nickel plated brass swing arm, loose key flow regulator and compression valve.

Can furnish any of above fittings with either china stream jets, china or nickel plated brass bubblers. F-2317 and F-2318 fittings can be furnished with push button or loose key valves. Special arms made to order. Couplings on F-2316 bubbler and F-2318 jet have $\frac{1}{4}$ inch iron pipe threads. Inlet on F-2315 and F-2317 jets have $\frac{1}{2}$ inch iron pipe female threads.

When ordering specify number of fitting and number and size of fixture for which fitting is intended

Fountain Fittings

F-2324

KOHLER China Non-squirting Stream Jet with nickel plated brass self-closing valve with china index, loose key flow regulator, adjustable for a continuous flow of water.

F-2324 For pan fountains.

F-2325 *For fountains with integral waste strainer.

*Cannot be used with 9 inch diameter fountains. Self-closing equipment for 9 inch fountains has F-2329 jet with self-closing valve in supply pipe under fountain bowl.

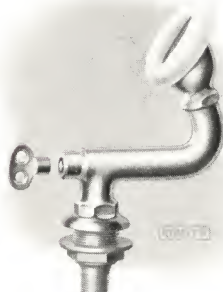

F-2326

KOHLER China Non-squirting Bubbler with ball bearing nickel plated brass self-closing valve, flow regulator and china handle. Adjustable for a continuous flow of water.

F-2326 For pan fountains.

F-2327 For fountains with integral waste strainer.

F-2328

KOHLER China Non-squirting Continuous Flow Stream Jet with nickel plated brass base and loose key flow regulator.

F-2328 For pan fountains.

F-2329 For fountains with integral waste strainer.

F-2330

KOHLER China Non-squirting Continuous Flow Bubbler with nickel plated brass base and flow regulator.

F-2330 For pan fountains.

F-2331 For fountains with integral waste strainer.

F-2326 and F-2330 fittings can also be furnished with nickel plated brass bubblers and loose key stops in body. Inlets on F-2324, F-2326, F-2328 and F-2330 fittings have $\frac{3}{8}$ inch iron pipe male threads and inlets on all others have $\frac{3}{8}$ inch iron pipe female threads.

F-2334 F-2335

KOHLER Galvanized Iron Combined $\frac{3}{8}$ inch Supply and $1\frac{1}{2}$ inch Waste Pipes for pedestal drinking fountains.

Sizes 30 36 inches

F-2334 For fountains with enameled pedestal.

F-2335 For fountains with pipe standard.

When ordering specify number and size

Sink Faucets

F-2345

KOHLER Nickel Plated Brass Quick Acting Compression Mixing Faucet with indexed china handles, stuffing boxes, swing spout, adjustable flange, 1/2 inch iron pipe female threaded inlets, and china draining soap dish.

Can be furnished for F-2348 and F-2349 hose couplings, short stationary spout, 3/4 inch iron pipe female threaded inlets, and without soap cup.

F-2345

F-2347

KOHLER Nickel Plated Brass Quick Acting Compression Mixing Faucet with indexed china handles, swing spout, solid flanges, 1/2 inch iron pipe female threaded inlets 8 inches center to center, and china draining soap dish.

Can be furnished for F-2348 and F-2349 hose couplings, short stationary spout, 3/4 inch iron pipe female and 1/2 inch or 3/4 inch male threaded inlets, and without soap cup.

F-2347

F-2348

F-2348

KOHLER Nickel Plated Brass Hose Coupling with valve for F-2345 and F-2347 sink mixing faucets.

F-2349

KOHLER Nickel Plated Brass Hose Coupling for F-2345 and F-2347 sink mixing faucets.

F-2349

For hose, spray and hook see F-1915

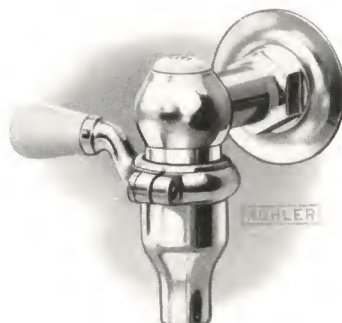

When ordering specify number

Sink Faucets and Strainers

F-2351

KOHLER Nickel Plated Brass Quick Acting Compression Faucet with adjustable china handle, china index, solid flange and $\frac{1}{2}$ inch iron pipe female threaded inlet.

Can be furnished with $\frac{1}{2}$ or $\frac{3}{4}$ inch iron pipe male or female threaded inlet, adjustable flange, spouts threaded for hose, and to operate either right or left hand. Regularly furnished with cold and hot water faucets right and left hand respectively.

F-2351

F-2355

F-2355

KOHLER Nickel Plated Brass Semi-quick Acting Compression Sink Faucet with four ball handle with china index, solid flange, and $\frac{3}{4}$ inch iron pipe female threaded inlet.

Can be furnished with $\frac{1}{2}$ or $\frac{3}{4}$ inch iron pipe male or female threaded inlet, adjustable flange and spout threaded for hose.

F-2382

KOHLER Nickel Plated Brass Sink Strainers with $1\frac{1}{2}$ inch tailpiece. Can also be furnished with $1\frac{1}{4}$ and $1\frac{3}{8}$ inch tailpieces.

F-2382 Open Strainer.

F-2384 With rubber stopper. For common overflow.

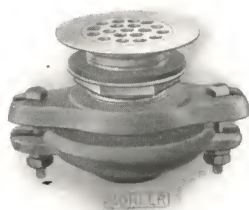

F-2386 Patent Overflow Sink Strainer with rubber stopper.

F-2386

When ordering specify number

Sink Fittings and Accessories

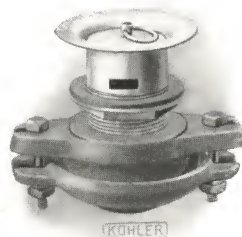

F-2396

KOHLER Nickel Plated Brass Sink Strainers with iron coupling and collar for lead pipe connection.

F-2396 Open strainer.

F-2398 With rubber stopper. For common overflow.

F-2401 Patent overflow sink strainer with rubber stopper.

F-2401

F-2402

KOHLER Nickel Plated Brass Sink Strainers with iron coupling threaded for 1½ inch iron pipe. Can also be furnished for 1¼ and 2 inch iron pipe.

F-2402 Open strainer.

F-2404 With rubber stopper. For common overflow.

F-2406 Patent overflow sink strainer with rubber stopper.

F-2406

F-2418

F-2418

KOHLER Moulded Rubber Mats for enameled drain boards.

F-2418 For interchangeable drain boards.

For Drain Boards:

16x18	inch long	16x24	inch long
18x18	inch long	18x24	inch long
20x18	inch long	20x24	inch long
22x18	inch long	22x24	inch long

F-2419 For drain boards cast one piece with sink.

For Drain Boards:

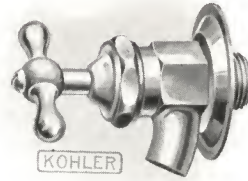

20x18	inch long	22x19	inch long
20x20	inch long	22x24	inch long
		20x24	inch long

When ordering specify number and size

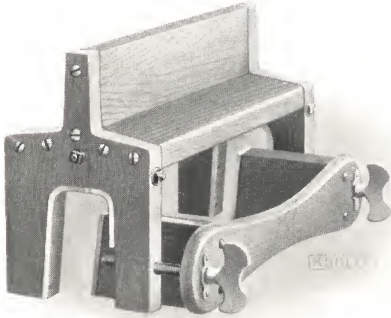

Miscellaneous Fittings and Accessories

F-2424

KOHLER Nickel Plated Brass Compression Laundry Tray Faucet with $\frac{1}{2}$ inch male threaded inlet.

F-2424

F-2425

KOHLER Wood Wringer Holder for clamping on side of one tray. Adjustable to all our laundry trays.

Length over all 14 inches

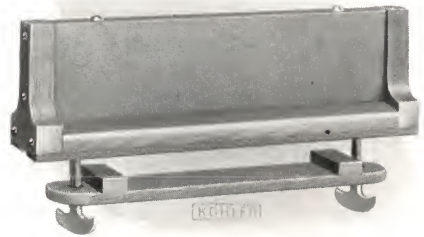

F-2425

F-2427

KOHLER Wood Wringer Holder for clamping on rims of two adjacent laundry trays.
Length over all 16 inches

F-2427 For flat rim laundry trays.

F-2429 For roll rim laundry trays.

F-2427

F-2451

KOHLER Special White Closet Seat with nickel plated brass hinges. Can be furnished in golden oak, genuine and imitation mahogany.

F-2451

When ordering specify number

Kohler Telegraph Code

Cable Address Registered: "Erkohl"

DOMESTIC

Combinations of Kohler Code Words, not exceeding fifteen letters, will pass as three words. To derive the full benefit of the code, telegrams should be written in five-code-word combinations as much as possible.

FOREIGN

Code messages made up of dictionary words not forming intelligible phrases, or of artificial words susceptible of pronunciation, must not contain more than ten letters to the word and are counted as one word. Unpronounceable words appearing in code messages are counted at the rate of five letters, or fraction thereof, to the word.

Two or more dictionary words combined into one word of ten letters or less will pass as one word in a CABLEGRAM.

Code language or combinations of dictionary words are allowed only in REGULAR or FULL RATE CABLEGRAMS, but NOT in DEFERRED LETTER and WEEK-END CABLES.

To use the Kohler Code to the most economical as well as practical advantage, REGULAR CABLEGRAMS only should be written in combinations of three code words as much as possible.

MONTHS

January	Jan.	May	May	September	Sep.
February	Feb.	June	Jun.	October	Oct.
March	Mar.	July	Jul.	November	Nov.
April	Apr.	August	Aug.	December	Dec.

Write dates as follows: Example—January 1st; Use code word for January—Jan.—to which affix code word for one—loc—or Janloc.

NUMBERS

$\frac{1}{16}$ kub	3 lof	27 ter	51 vec	75 wal
$\frac{3}{32}$ kuf	4 loh	28 tes	52 ved	76 wam
$\frac{1}{8}$ kul	5 lol	29 tet	53 vef	77 war
$\frac{3}{16}$ kup	6 lom	30 tez	54 veh	78 was
$\frac{1}{4}$ kut	7 lor	31 toc	55 vel	79 wat
$\frac{5}{16}$ lab	8 los	32 tod	56 vem	80 waz
$\frac{3}{8}$ laf	9 lot	33 tof	57 ver	81 wec
$\frac{1}{2}$ lah	10 loz	34 toh	58 ves	82 wed
$\frac{5}{8}$ lal	11 tac	35 tol	59 vet	83 wef
$\frac{3}{4}$ lam	12 tad	36 tom	60 vez	84 wel
$\frac{7}{8}$ lar	13 taf	37 tor	61 voc	85 wem
0 las	14 tah	38 tos	62 vod	86 wen
00 lat	15 tal	39 tot	63 vof	87 wep
01 lec	16 tam	40 toz	64 voh	88 wer
02 led	17 tar	41 vac	65 vol	89 wes
03 lef	18 tas	42 vad	66 vom	90 wet
04 leh	19 tat	43 vaf	67 vor	91 woc
05 lel	20 taz	44 vah	68 vos	92 wod
06 lem	21 tec	45 val	69 vot	93 wof
07 ler	22 ted	46 vam	70 voz	94 woh
08 les	23 tef	47 var	71 wac	95 wol
09 let	24 teh	48 vas	72 wad	96 wom
1 loc	25 tel	49 vat	73 waf	97 wor
2 lod	26 tem	50 vaz	74 wah	98 wos
				99 wot

Write numbers over 99 as follows: Example—7501—Use code word for 75—wal—to which affix code word for 01—lec—or wallec.

To write sizes requiring the specification of two dimensions, place the letter x between the two parts of the code word used. Example: 18x30"—18 tas, x, 30 tez, inches yem, or "tasxtezyem."
